User Guide for George Android Apps – notes for CW Tune Player

Please note that CW 534 *Camberwell* is not supported. If this tune is selected the app will advise the user of this with a pop-up when START is pressed.

For the following CW tunes the *Number of verses* slider is ignored and this is indicated above the slider.

824	*Lauda Anima*
1063	*Adeste Fideles*
1082	*St George's Edinburgh*

This is because those tunes differ between verses and the MIDI recording contains the whole sequence for all verses.
Please also note that for these tunes, the *Verse gap* setting has no effect on the time between verses although it does still control the time between the introduction and the first verse.

For the following tunes the number of tunes played will be one less than set by the slider. This is because verse 1 is also the refrain for further verses.

625	*All things bright and beautiful*
626	*Royal Oak*
